- Menu Button:** Access the settings where you can configure things such as font display and ringtone.
- Volume Button:** Adjust the Ring, Headset, Handset and Speaker volume.
- Flexible Buttons:** A line of feature can be assigned to these buttons.

Operating your IPECS 1040i Handset!

Transferring Calls

While on an active call that needs to be transferred to another user:

- Press the button of the user you wish to transfer to **(the caller will be put on hold at this point)**
- Wait for them to answer and see if they want to take the call.
- If they do want to take the call, put the receiver down to transfer.
- If they don't want to take the call, press Transfer(trans) to return to the caller.

Accessing the Company VM

- Press on the Voicemail flex key, (under the line key)
- Press on the Envelope key (under Menu) and press key number 2.
- You will then be asked for a password, by default the password is: **147963#**
- You'll then be read any new voicemails and given options.

If the LED next to the Voicemail Flex Key is flashing, there is a new voicemail to listen to.

Muting yourself while on a call

1. Press the **mute** key (Under the Envelope) to mute yourself during a call.
2. Press the same button again to then unmute yourself.

Placing/Retrieving Calls on Hold

To put a call on hold:

1. Press the **Hold** key
2. Put the handset down

To retrieve a call that is on hold:

1. Pick up the handset
2. Press the **Hold** key.
